Art Unit: 2618

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. The information disclosure statement filed on 06/14/2005 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was

•

Art Unit: 2618

not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

4. <u>Claims 1, and 4-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Walton et al. (US 2003/0128658, hereinafter, "Walton") in view of Berezdivin et al. (U.S. 2003/0203721, "Berezdivin") and further in view of Admitted Prior Art, hereinafter, "APA".</u>

Regarding claims 1 and 6, Walton teaches a radio transmitting apparatus of a multicarrier system in which data is transmitted simultaneously to a plurality of receiving stations using subcarriers, said radio transmitting apparatus comprising (see figure 1, base station 104, plurality of terminal 106):

a scheduler that selects a receiving station on a block unit basis (see [0012]).

It should be noticed that Walton fails to teach a controller that adaptively varies a number of subcarriers per block for each receiving station based on a propagation environment of a receiving station. However, Berezdivin teaches such features (see [0063-0066]).

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate the teaching of Berezdivin into view of Walton in order to increase transmission capacity as suggested by Walton at [0005].

Walton and Berezdivin, in combination, fails to teach a blocking section that divides subcarriers into blocks. However, APA teaches such features (see page 1, ln.12-17).

Art Unit: 2618

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate the teaching of APA into view of Walton and Berezdivin in order to increase transmission capacity as suggested by Walton at [0005].

Regarding claim 4, Walton further teaches terminal equipment (see figure 1, mobile 106).

Regarding claim 5, Walton further teaches base station (see figure 1, base station 104).

Allowable Subject Matter

5. Claims 2-3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tuan A. Pham whose telephone number is (571) 272-8097. The examiner can normally be reached on Monday through Friday, 8:30 AM-5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Matthew Anderson can be reached on (571) 272-4177. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
